

AT HOME CRAFTS

JELLYFISH

DID YOU KNOW

Jellyfish do not have eyes.

Jellyfish do not have ears, a heart, nor a head.

Jellyfish are invertebrates.

Their body is almost totally made of water.

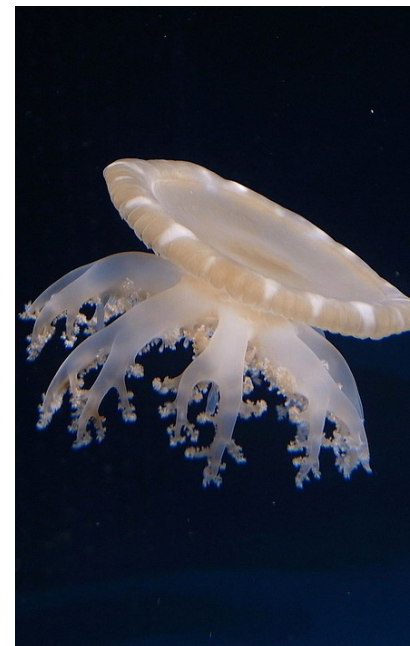

Create your Own Jelly!

MATERIALS NEEDED: Glue, paper plates, tissue paper, markers, hole punch, yarn or ribbon, googly eyes or draw eyes.

Steps:

1. Take your paper plate and cut it in half. Once cut use the hole puncher to make the holes at the bottom of the plate.
2. Next is the fun part, where you decorate your jellyfish however you want
3. Once decorated, you can grab the yarn or ribbon and place them through the holes and tie them but make sure they hang as those are their tentacles!

Your done! Now you can name your jellyfish and enjoy! You can even hang it above your bed!
